# REMOTE PATIENT MONITORING (RPM) PROGRAM

## **PULSE OXIMETER** QUICK START GUIDE

Medical Brain has partnered with Wellue® to bring you a best-in-class self monitoring fingertip oximeter device which meets U.S. Food & Drug Administration (FDA) guidelines.

You will find in this guide:

- All steps needed to connect this device to the Medical Brain app
- How to take regular readings

## **WELCOME,**

Your provider has selected you for the Medical Brain Remote Patient Monitoring (RPM) Program with YOUR healthcare needs in mind. We're linked to your provider. No gaps, no delays.

**We're here for your health!**

The Medical Brain Team

## **The Medical Brain RPM Program provides you with:**

Your pulse oximeter selected for you by your provider

Your Medical Brain app – your personal health assistant that always understands your health needs and takes immediate actions to prevent problems

Should you experience a change in your health, the Medical Brain will notify your provider for early intervention and treatment

Your dedicated Medical Brain Care Team, in partnership with your provider, giving healthcare support when you need it the most

# 1

## **How to get started**

Our Client Success team will call you within two business days - from the moment you receive your device(s) - to help you connect your pulse oximeter, take your first reading, and walk you through the Medical Brain app's main features.

The following steps (2-6) will show you the one-time process you will do with our Client Success team on the phone to connect your pulse oximeter to the Medical Brain app.

## 2

### **Get your phone ready to connect with your new device**

Ensure Bluetooth is turned ON in your phone

If OFF, how do I turn it ON?

- 1 Go to your phone's home screen
- 2 Tap on the "Settings" icon
- 3 Look for  "Bluetooth" in the list
- 4 Tap the "Bluetooth" switch to turn it ON

# 3

## Install the included batteries into your pulse oximeter

Install batteries with the positive (+) and negative (-) terminals properly aligned with the corresponding symbols in the battery compartment.

# 4

## Take first reading

Open the clip and put finger inside the rubber cushions of the clip (make sure the finger is in the correct position), and then clip the finger.

Wait 2 seconds, the Oximeter will power on automatically and start to measure.

Your measurement will be sent to the Medical Brain.

# 5

## Allow permissions

At this point, your pulse oximeter is connecting with your phone and the Medical Brain app.

To enable connection, please allow all requests for Bluetooth and/or Location.

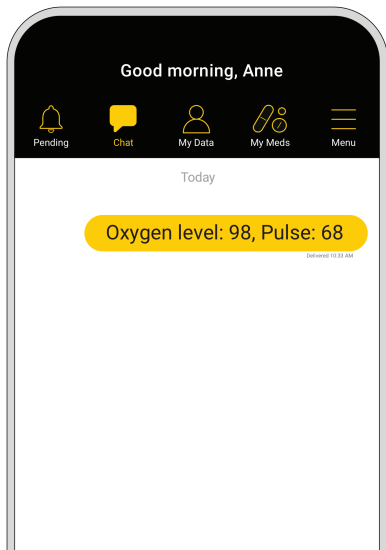

Not allowing these permissions will stop the pairing (connecting process).

# 6

## View measurement

- Medical Brain will present your first measurement
- Tap on “Done” to see it added to your chat

### Congratulations

Your first measurement is  
Oxygen level: 98, Pulse: 68

### For future measurements:

Simply open the app, use your device and confirm your measurement when prompted

DONE

Note: If you received more than one device, you will be redirected to “Measurements” screen to set up the next device instead of to the Chat.

## How to take readings regularly?

Just open the app, use your pulse oximeter and confirm your measurement when prompted.

Measurement will be shown in “Chat” and logged under “History” for you and your provider to see.

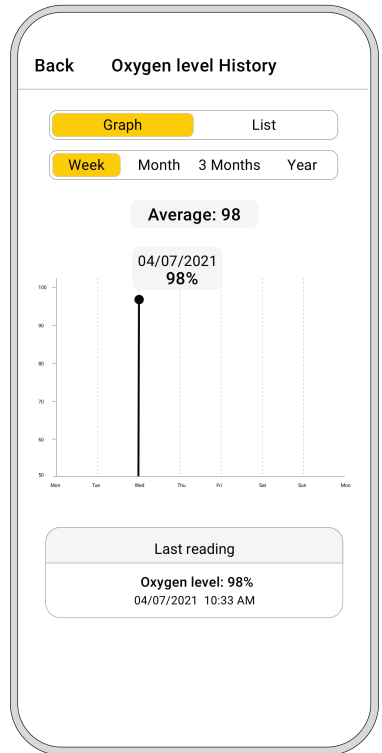

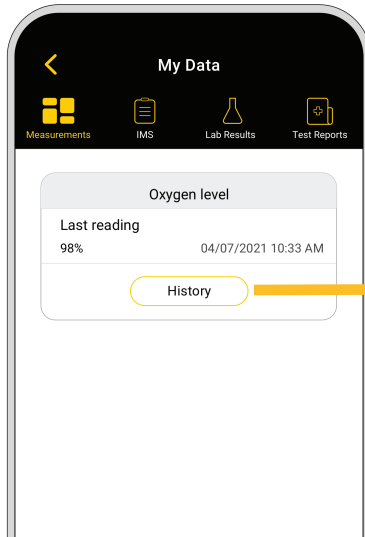

### **So much more than reporting measurements**

Speak (or text) with the Medical Brain anytime. The Medical Brain understands you and knows your health profile for accuracy and care coordination. You can provide information such as:

- *My medications are making me feel nauseous. What should I do?*
- *My oxygen level is 84%*
- *I need to refill my medication*
- *I would like to schedule a doctor visit*

# Track your measurements

All your measurements will be saved and displayed in the Medical Brain app under "My data" > "Measurements" > "Oxygen level" > "History."
